Fake News Faux Real :
Group 24 : Limitations

Limitations

1. Needs more optimised algorithms as detection speed can be a bit slow.

2. Currently, majority of the detection is limited to Donald Trump and data before 2021.

3. More data needs to be fed to the model to make it even more accurate.

4. We are limited by storage solutions.

5. We were curbed by premium news subscriptions and websites which detected scrapers.

6. We were not able to incorporate more domains such as mobile phones, tablets etc.

7. We wanted to cover a whole more range of newspapers.
